IBRA Scholarship Report

Dr. Mario Bisama Vasquez
Orthopedic and Trauma Surgeon at Barros Luco – Trudeau Hospital, Santiago, Chile
Hand Surgery Fellowship, Universidad de Chile.

Scholarship Type B, 01/04 to 30/04/2019, UKH Lorenz Böhler, Vienna, Austria.
Fellowship Director: Prof. Dr. Martin Leixneing

As a young surgeon, the new experiences, both surgical and life experiences, are always well received, and the time I could share with Dr. Leixnering and his team at the UKH Lorenz Böhler has been one of the most satisfying experiences I have had in professional training.

My expectations when arriving in Vienna were high, mainly due to the great experience of the hand team, which I only knew from the publications I had read during my training as a hand surgeon in my country.

I must thank the great willingness of Dr. Leixnering and his team, consisting of Prof. Dr. Pezzei and Drs. Jurkowitch, Quadlbauer, Keuchel and Beer, who made me feel part of him from the first day, sharing his great experience in both the surgical management of both trauma and orthopedic pathology. We were able to share visions of study, diagnosis and treatment that will be very useful in my professional practice.

Among the pathologies that I could observe and participate are:

Treatment of Wrist, Scaphoid, Metacarpal and Phalangeal Fractures
Arthrosis Treatment
Orthopedic Pathology of the Hand
Reimplantation in Severe Injured Hand
Nerve Reconstruction
Shockwave Therapy in scaphoid pseudoarthrosis.

I also had the opportunity to accompany them to the IBRA Advanced Course of Traumatic Pathology of Wrist in Prague, where you can attend presentations of several European and American experts

I reiterate my thanks to Dr. Leixnering and his team for the great reception and the IBRA Foundation that allowed my visit to the UKH Lorenz Böhler, my expectations were fully met, and I urge my colleagues interested in surgery to consider this center for Visit it and learn as much as you can with this great team.
